Welcome...

Welcome to the Quick, Easy, Tasty Recipe Book. This book will be your bible over the coming weeks! In case you didn't know, nutrition will count for about 80% of your results. That's right 80%! There is an important lesson to be learned from the story below...

You see I used to have a client, let's call her Lisa. Now Lisa trained very hard and never missed a training session and so with all this effort and dedication to her training she thought that the scales and the measuring tape would really be moving in the right direction at her weights and measurement day. I will never forget the look on her face when she found out that she lost only 1lb and half an inch from her waist. She was disappointed and so was I.

"You have read the information on the importance of nutrition and you have been using the recipe book I gave you?" I asked. It turned out she never read it because she thought she already knew about nutrition and that her personal trainer wasn't going to know more than she did.

Sometimes we learn the hard way! I'm pleased to say that once Lisa had become fully aware of the importance of nutrition for fat loss, we were able to make some important changes. 28 days later she was 14lbs down and almost 2 dress sizes smaller.

As the saying goes, **"When the student is ready, the teacher will appear."**

And you are ready! That's why you are reading this!

Below I have included the key principles that work for nutrition for health and fat loss. If anything you read, see or hear deviates from any of the six principles below, chances are you can dismiss it immediately as a short term fad diet. This is a way of eating that will enable you to achieve both fast and permanent results in a way that is 100% sustainable. You see this change has to be permanent so it has to be both straightforward and above all enjoyable. The good news is that my recipe book will show you how quick, easy and tasty eating this way is.

Follow these principles and you will get results...

1. Eating fewer calories than you burn (calorie deficit)
2. Eat more vegetables and fruits because they are rich in antioxidants and micro-nutrients (vitamins and minerals)
3. Eat plenty of protein for repair and maintenance of lean tissue, and to keep you feeling full (protein satisfies the appetite more than any other macronutrient)
4. Eat enough healthy fats from oily fish, nuts, avocados, coconut and olive oils (healthy fats are an essential part of a balanced diet)
5. Drink plenty of water to naturally detoxify the body, keeping the brain and body hydrated so it can function properly (green and herbal teas count towards this water intake)
6. Limit processed foods and artificial sweeteners and preservatives

Now go and learn, cook, and experience the benefits that my recipes have to offer – enjoy!

Let's get started...

Below are a few hints and tips to help you along the way.
Please spare a few minutes to read this before you get cooking.

COOKING WITH FATS AND OILS

For cooking and frying at high temperatures, coconut oil is safe to use, as it remains stable at higher temperatures. In other words, unlike many other oils and fats, it won't become damaged when heated above a certain temperature. When oils become damaged, they turn rancid, which can be damaging to your body. Coconut oil is high in lauric acid, a fatty acid that is anti-fungal, anti-bacterial and anti-viral.

For salads, use cold pressed extra virgin olive oils, sesame or peanut oils. There are also a variety of fats and oils that should be avoided completely. All hydrogenated and partially hydrogenated oils are bad for you and can contribute to a range of serious health problems such as cancer, heart disease and immune dysfunction.

A note about dairy / dairy free products:

If you are following a dairy free diet, it is best to cook with coconut oil where possible. Good quality ghee contains very small amounts of lactose and casein and therefore is suitable for many people who are lactose intolerant.

COCONUT FLOUR

A gluten free alternative to normal flour. This is a versatile ingredient, which can be used in baking and cooking. Makes great pancakes!

WHERE TO BUY

Coconut Oil and Coconut Flour:

Available on **Amazon** and in **health stores** and **major supermarkets**

TEA

Green tea has lots of amazing health benefits. It is high in antioxidants and contains about half the amount of caffeine of normal tea. It is widely available in supermarkets, health shops and online.

Tulsi Brahmi (caffeine free) is another healthy alternative with healing properties, as well as also being a rich source of antioxidants.

Of all herbal teas, liquorice tea is arguably one of the most beneficial yet under-appreciated herbal teas. Liquorice tea can help the liver to rid the body of unwanted toxins, can relieve constipation, is used to treat low blood pressure, helps to lower cholesterol and is an anti-allergenic so is helpful for hay fever and conjunctivitis sufferers.

STORECUPBOARD SAVIOURS

There are plenty of simple ways to make your food taste good. Why not keep your cupboards stocked up with a handy supply of spices and rubs, which are generally very cheap to buy, simple to use, and a much healthier alternative to the artificial flavourings, additives and sugars found in many of the processed sauces available.

Consider replacing cheap, processed table salt (which is full of chemicals and some even contain sugar!) with a good quality organic sea salt or Himalayan pink salt. This salt contains many beneficial minerals and can help balance electrolytes, eliminate toxins and support nutrient absorption.

WHERE TO BUY

Tulsi Brahmi Tea: Available on **Amazon** and **www.discount-supplements.co.uk**

Liquorice Tea: Available on **Amazon** and in **health stores** and **major supermarkets**

Himalayan Pink Salt: Available on **Amazon** and in **health stores** and **major supermarkets**

A LITTLE SWEETNESS

Sugar gets a lot of bad press these days due to the negative effects it can have on your health. For example, excessive consumption suppresses the immune system and reduces insulin sensitivity.

However, I believe it is important to consider the for and against, and not just react to what we see in the news. If you lead a healthy lifestyle, eat a balanced, varied diet, and enjoy moderate regular exercise, then there really shouldn't be cause for panic.

Within the huge category that sugar spans, are a range of good and bad food choices. If, for example, you cut out all fruit for the rest of your life (because fruit contains sugar), you might well miss out on some key nutrients. Plus you may feel deprived.

My advice to you is that it is your choice if you consume sugar and/or sugar alternatives. But what is probably more important is to consider that worrying about the matter could be equally bad or even worse for your health. Instead, why not try to look at sugar and sugar alternatives as a 'treat' rather than a necessity... something to really savour and enjoy every once in a while (without the guilt!).

In some of my recipes I have used natural sweeteners such as Stevia. Many research studies have been conducted on the safety of these products and while no definite links have been made to any negative health effects, overall the evidence for and against it is still inconclusive. If you'd prefer to swap the sweeteners in my recipes with something else then feel free to do so. Home made apple sauce, raisins and bananas can add enough sweetness to a variety of baking recipes.

Note: There are several forms of Stevia available - a very light powdery texture, and a more granulated/grainy texture. In all of my recipes, I have used the granulated version. I recommend you use the same, so that the ingredient weight is accurate.

WHERE TO BUY

Stevia: Available on **Amazon** and in **health stores** and **major supermarkets**

FLAXSEED

Flaxseed is rich in omega-3 fatty acids and fibre. It is a great ingredient to use in cooking and baking, e.g. spelt bread, cakes, pizzas (yes, healthy ones!), mixed in with nut butter or humous dips, added to pancake mixes, sprinkled over cereals or salads or added to smoothies.

It's best to grind the flaxseed up in a coffee grinder first, as it is not absorbed by the body if left whole. If you mix flaxseed with water and leave to stand for 10 minutes, it develops a sticky coating, which makes it a great egg substitute in baking (as do chia seeds). Always store your flaxseed in the fridge in an airtight container.

WHERE TO BUY

Flaxseed: Available in **major supermarkets**

WHITE OR WHOLEGRAIN RICE?

Generally speaking, wholegrain, unprocessed carbohydrates tend to be better handled than processed carbohydrates such as white rice, pasta, bread and cereals.

Wholegrain rice is probably a healthier option than white rice, nevertheless it should still be consumed in moderation, especially if you are trying to lose fat. In most cases, where rice appears in this book, I haven't specified white or wholegrain rice. Please decide for yourself which is the best option for you.

A helping hand...

Through a combination of good nutrition and exercise, the following recipes will help you achieve optimum fat loss results.

Here are some low carb recipes, ideal for a non training day:

Breakfast

- Meat & nuts
- Bacon & egg frittata
- Allowable English breakfast
- Poached salmon protein brunch

Lunch & Dinner

- Dill & caper salmon burgers
- Turkey coconut burgers
- Low carb quiche
- Crunchy mackerel salad
- Low carb chilli cheese burgers
- Spicy salmon parcels
- B.C.T.A.
- Quick fish stew

Snacks & Treats

- Mediterranean meatloaf
- Protein-rich Scotch eggs
- Pistachio & goji bark
- Strawberry protein balls

Smoothies

- Supreme green smoothie
- Pina colada

Research has shown that the body can tolerate carbohydrate better after exercise. If you are going to consume carbs, you should aim to do this within 2 hours of exercise.

Here are some recipes which are ideal post-workout. These are also medium / high protein to aid muscle repair.

Breakfast

- Crunchy protein quinoa
- Fruit & nut porridge
- Breakfast burrito
- Summer fruit pancakes

Lunch & Dinner

- Chicken, rice & pepper pot
- Lentil pepper soup
- Authentic curry
- Chilli con cauli
- Fragrant fish soup
- Warming stew
- Hot Thai pie

Snacks & Treats

- Flaxseed spelt bread
- Carrot & ginger loaf
- Indulgent cookie cakes
- Banana yoghurt

Smoothies

- Beetroot, orange & carrot cooler
- Oaty berry smoothie

Your guide to Hormones

Understanding how hormones work and how our lifestyle choices affect our hormone levels is vital if we want to get the best results possible. In fact I'd go as far to say that if our hormones are not regulated properly it can massively sabotage our results and lead to poor health.

Obesity, diabetes, heart disease and depression are just a few of the diseases that hormonal imbalances contribute towards. The good news is that the recipes in this book have been designed to help get and keep you healthy. Whilst the diagnosis and treatment of hormonal imbalances should be left to medical experts, we can have a positive impact on our hormones by leading a healthy lifestyle.

A basic understanding of the key hormones that regulate metabolism, hunger, body fat, and energy levels is useful for understanding how different lifestyle choices affect your body.

Every time we eat, exercise, sleep, get stressed or meditate; hormones are released.

We want to make sure that our lifestyle choices are geared towards controlling these hormones.

What are hormones?

Hormones are chemical messengers that communicate information throughout the body. You can think of hormones as radio signals that are telling different cells in the body to do different things.

Depending on our lifestyle choices, the hormones released will dictate whether we burn or store body fat, feel hungry or satisfied, build muscle or not, feel relaxed or stressed, and whether we are able to sleep well or have restless nights.

Can you see why this is so important to your health and the results you want to achieve? We're going to look at a variety of different hormones that influence our health and our body composition. Let's get started...

Insulin

Insulin is released from the pancreas in response to our blood sugar levels. When our blood sugars increase, insulin is released and it's job is to tell the body to store the sugar in our muscles and liver. In order for us to have steady energy levels throughout the day and be able to burn body fat, we need to manage our insulin levels properly.

We do this by controlling the amount and type of carbohydrates we consume. This doesn't necessarily mean eating a low carbohydrate diet all of the time (although that might work for some people), it means that we avoid the overconsumption of foods with lots of added sugars. After eating a sugary snack you may have experienced an energy spike followed by an energy crash. This happens because blood sugar levels increase rapidly, prompting the release of insulin to lower our blood sugars, since high blood sugar is toxic. We can then be left with blood sugar levels that are too low. This can make us feel lethargic and hungry. It's at these times when we are likely to crave more sugary, carbohydrate rich foods. This causes us to experience "peaks and troughs" in our energy levels.

How popular food choices affect energy levels and hunger

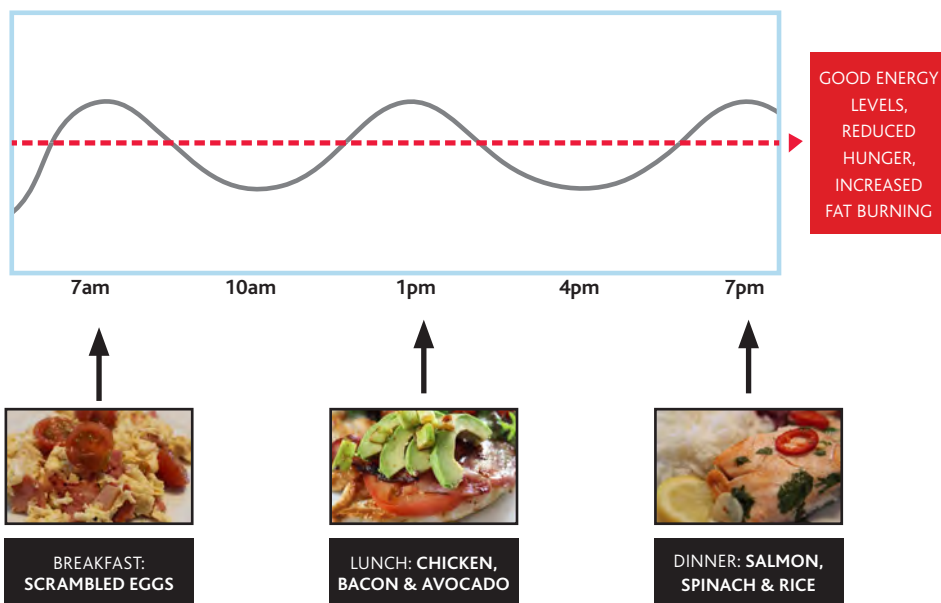

The ideal scenario, both from an energy perspective and for us to get the results we want is to consume the right nutrients that will allow us to have stable, steady blood sugars and well regulated insulin levels throughout the day.

These nutrients include:

- Proteins
- Fats
- Fibre-rich complex carbohydrates

Fats and proteins do not cause insulin levels to increase anywhere near as much as carbohydrates do, that's why it's essential that we eat proteins and healthy fats. By doing this we can feel full and avoid energy crashes.

There is a term called **insulin resistance**, which is when the body is producing insulin but the cells just aren't listening. Imagine an 18 year old having their first alcoholic drink, they'd probably get drunk quite quickly. Next imagine a 30 year old who has been binge drinking most weekends, it probably takes a lot more alcohol for them to get drunk. It's similar with insulin and after years of eating too many sugary carbohydrates, our cells can become resistant to insulin.

We then need our pancreas to produce more insulin to shift the same amount of sugar out of the blood and into storage. This can be the beginning of metabolic syndrome and type 2 diabetes.

The two main culprits behind insulin resistance are a lack of exercise and a hyper-caloric diet high in refined carbohydrates. The good news is that insulin sensitivity can be regained with the right combination of diet and exercise.

Glucagon

If we think of insulin as a **"storage hormone"** then we can think of glucagon as a **"mobilisation hormone"**.

Glucagon tells our muscle and fat cells to release energy for us to use to fuel our daily activities. If we consume a surplus of Calories and lots of sugary carbohydrates, glucagon doesn't need to do its job because there's already too much energy available. Insulin and glucagon are both released from the pancreas and work with each other to regulate our blood sugars and energy levels. If our insulin levels are jacked up due to having too much blood sugar, not much glucagon will be released and we won't be able to burn fat effectively. When our insulin levels are low, the body will release more glucagon which can then prompt the release of our energy stores (including stored body fat). This is what we want!

In a nut shell, by eating the right foods to prevent insulin spikes, glucagon can do what we want it to do; help us to use our fat stores for energy!

Cortisol

Cortisol is a hormone that is released from the adrenal glands (along with adrenaline). Although cortisol gets a bad wrap, it's actually very necessary for us to have cortisol; just not chronically elevated levels or unhealthy cortisol rhythms.

It's usually described as a stress hormone because we release cortisol (and adrenaline) in stressful situations. If we didn't release cortisol in the morning then we would struggle to wake up.

Cortisol levels should rise in the mornings so that we feel energetic in the daytime and our cortisol levels should gradually lower throughout the day, enabling us to feel relaxed and naturally tired in the evenings.

Modern life can be stressful and if, for example, we are stressing out over a work situation at night, then our cortisol levels can become elevated at a time when they should be low.

Overtraining can also cause our cortisol levels to become chronically elevated so it's important that our training programmes are assessed regularly.

How healthy cortisol levels look:

Some of the reasons that our cortisol levels become imbalanced:

- Poor sleeping habits
- Inability to handle or manage stress
- Overconsumption of stimulants; caffeine for example
- Overtraining; training too long / frequently at high intensity

When cortisol gets out of control we can experience suppressed immune system function, elevated blood sugars, faster ageing, poor insulin sensitivity, lower sex drive and an increase in abdominal fat storage. This is the perfect recipe for getting sick, fat and wrinkly. As if that's not bad enough, chronically elevated cortisol often leads to cravings for high Calorie, sugary foods.

Things that can help to restore healthy cortisol levels:

- Getting to bed before 10:30pm every night
- Learning a cognitive strategy such as CBT to learn how to cope better with stress
- Taking time to meditate / relax / chill out more often
- Reducing caffeine intake, especially in the afternoons
- Ensuring your training regimen is assessed regularly

Growth hormone

Human growth hormone has been described as **"the fountain of youth"** and not surprisingly growth hormone supplementation is now big business, especially in the USA.

Healthy growth hormone levels help to keep us lean, healthy and strong. As we age our levels of growth hormone decline, for example a 60 year old may only produce 25% of the growth hormone that a 20 year old produces. In that sense there's not a lot we can do, because we're all getting older! What we can do is to look at ways to help our bodies produce growth hormone normally and naturally.

Growth hormone is mainly released / elevated when we are:

- Sleeping
- Exercising
- Fasting

So if we are not sleeping properly, not only is our cortisol rhythm disturbed, we miss out on our natural growth hormone release during sleep. Another great reason to get to bed early and to ditch the caffeine!

Exercise causes the release of growth hormones, so if we are exercising regularly then our bodies will be producing growth hormones naturally. Fasting also increases growth hormone levels, that's one of the reasons why intermittent fasting has become popular. Whether or not you should fast is an individual decision and it's important to note that although it can increase growth hormone, it can also increase cortisol levels, so if you're already stressed then fasting might not be the best option.

Eating too many sugary carbohydrates can also lower growth hormone, yet another reason to ditch the junk foods.

Testosterone

Although testosterone is the dominant male sex hormone, it is produced by both men and women. **Healthy testosterone levels are associated with drive, motivation and virility.** As we age, testosterone production declines and this contributes to the loss of muscle mass that people experience as they age. Low testosterone levels are associated with increased risk of cardiovascular diseases, depression, lethargy and lack of motivation.

It is to be expected that certain hormones decline with age, in fact it's completely normal and natural, but what is a concern is the generational decline in testosterone levels in males. Our grandfathers, on average would have had much higher testosterone levels throughout their lives.

One of the reasons for this is that modern life can be a lot more stressful. So it's not that surprising when we see studies showing that cortisol blocks the effects of testosterone.

What can we do?

Luckily there are things we can do to maintain healthy testosterone levels:

- Get to bed early
- Learn stress management techniques
- Train with heavy weights
- Eat enough fat (our bodies make testosterone from cholesterol)

Training with heavy weights will not cause women to look big and bulky because females have a very small amount of testosterone compared to males.

TOTAL TESTOSTERONE LEVELS		
SEX	ng/dl	ng/ml
Females	6-86	0.1-1.2
Males	270-1100	1.4-12

As you can see from the table above, males have a lot more testosterone than females, which explains the difference in ability to build muscle mass.

Oestrogen

It's often thought that information about oestrogen is only relevant to females. Oestrogen however, is an important topic for any man experiencing the dreaded "man boobs" or "moobs". **Men need a normal, healthy level of oestrogen just as women need a normal healthy level of testosterone.** The problem arises when oestrogen becomes out of balance with testosterone, this is when guys can literally start growing what look like breasts. Obesity as well as exposure to environmental oestrogens such as plastics are thought to contribute towards the disruption of healthy sex hormone levels in males.

For women, healthy oestrogen levels are essential for heart and bone health as well as many other functions in the body.

Estradiol is the primary oestrogen that a woman relies upon during her younger years to keep her healthy and lean. Estradiol also helps to regulate appetite, mood and energy levels. As a woman goes through the menopause, production of estradiol decreases and this leaves another form of oestrogen, estrone, as the main oestrogen. Estrone is linked with increased abdominal fat storage and unfortunately, the more fat that is gained, the more estrone is produced. This can make losing body fat much more difficult and extra attention must be placed upon diet and exercise during and after the menopause. Estrone can also contribute to insulin resistance, another good reason to avoid binging on sugary carbohydrates and opt instead for proteins, fats, vegetables and complex carbohydrates.

Another hormone that drops at the menopause is **progesterone**. Because progesterone is a precursor for testosterone and estradiol, this now means that there is less testosterone and estradiol available to have a positive effect on body composition, mood and appetite regulation. This is why it's so important to do everything within our control to promote healthy body composition, mood and appetite regulation. We can do this by paying attention to diet, exercise and stress levels.

Chronically elevated cortisol around the time of the menopause needs to be avoided because cortisol and progesterone may compete for the same receptors. This means that cortisol can exhibit a blocking affect on progesterone. This is definitely not good if we consider progesterone levels are already dramatically lowered after the menopause. **The key message is to learn how to manage stress and make the right lifestyle choices.**

Thyroid

Thyroid hormone is often referred to as “the master hormone” and with good reason. Thyroid hormones have a huge impact on metabolic rate. If you or anyone you know has suffered with under-active thyroid then you know all about the weight gain and lethargy that can be experienced when the thyroid isn't functioning optimally. On the contrary, when the thyroid is over-active, people lose weight rapidly and can become anxious.

Important nutrients for thyroid health include; iodine, selenium, vitamin D3 and vitamin B12.

Cruciferous vegetables like broccoli contain substances called goitrogens that inhibit the thyroid gland. Most of these substances are destroyed by cooking, so it's important to cook your cruciferous vegetables.

Leptin

Leptin is a hormone that decreases hunger by signalling to the brain that we have enough energy (fat) stores in our body. The problem is that, as in the case with insulin resistance, we can become resistant to leptin. The leaner someone is, the more sensitive to leptin they are, so a small amount of leptin does the job of telling us we're not hungry. This makes sense when we consider that leaner people actually have less leptin, even though they have less energy (fat) stored in their bodies.

When someone is leptin resistant, although they may have more leptin, the message doesn't get through and the result is feeling hungry. Not sleeping properly can also decrease leptin levels.

What can we do?

- Take Omega 3 fish oil – Omega 3 fats are associated with decreased hunger
- Go to bed early
- Reduce stress
- Reduce caffeine

Ghrelin

Ghrelin is the hormone that tells us that we are hungry. When it's coming up to meal time, we will naturally feel hungry, this is because ghrelin is being released. There's not a whole lot we can do to directly influence ghrelin, apart from, you guessed it, sleep well! Studies show that lack of sleep increases ghrelin, possibly making us hungrier and more likely to make poor food choices.

It's not only leptin and ghrelin that regulate our appetite, so we still can put practices into place to help us get our appetite under control.

There are other ways to help:

- Consume fibre rich foods to help keep us feeling full
- Consume enough protein and fat because these two nutrients help to satiate us more than carbohydrates
- Drink enough water – sometimes when we think we are hungry, we're really just thirsty
- Avoid consuming too many sugary foods that cause blood sugar to spike then crash

Conclusion

There are many hormones in the body, all having unique actions in maintaining sound health. The interplay between all the different hormones is complex, and while we don't need to understand everything about hormones, we can conclude that **the right lifestyle choices play a huge role in balancing our hormones.**

To help balance all of our hormones naturally we need to:

- Get to bed early as often as possible
- Learn strategies to cope better with stress
- Taking time to meditate / relax / chill out
- Ensure we are not overtraining
- Perform resistance training
- Reduce caffeine intake
- Eat well

Milk kefir

2 tbsps Kefir milk grains (available on Ebay or Amazon)

1 litre glass jar with lid, sterilised

1 litre full cream cow or goats milk
plastic sieve

plastic or wooden spoon

glass bottle, sterilised

MAKES 10 x 100ML SERVINGS

Place the kefir grains in the glass jar.
Add the milk and close lid gently (do not close too tightly).

Place jar in room temperature and away from direct sunlight. This is found to be the best environment for kefir fermentation.

Leave for between 12 hours to 2 days.
After 12 hours, you will have a mild tasting milk kefir. After 24 hours, it will be more tart. After 48 hours, it will have a more zesty taste.

Use the sieve and spoon to separate the milk from the grains. Pour the kefir milk into a sterile glass bottle and refrigerate.

You can either allow the grains to rest for a few days, covered in a little cold water or milk and placed in the fridge, or start another batch again. Rest the grains every few weeks to get the best from them.

Your grains will last a lifetime, if you look after them!

Note:

Do not allow the grains to come into contact with metal as it will damage them. One shot of kefir milk per day will have a significant impact on your digestive health.

Blend the kefir milk with a handful of frozen berries and a scoop of chocolate flavour whey protein to create a delicious post workout smoothie.

Preheat oven to 150°C/300°F.

Place six of the eggs in a saucepan and cover with water. Bring to the boil, then simmer for 5 minutes. Remove from heat and replace the hot water in the pan with cold water. Set aside.

In a large bowl use your hands to combine the mince, bacon, salt, pepper and oregano.

Break the remaining egg into a separate bowl and whisk lightly. Add a small amount to the pork mixture and mix together.

Cover the surface of a large plate with the ground almonds. When the boiled eggs are cool, peel carefully. Take some of the pork mixture and use your hands to shape it around the egg. Add a coating of the whisked egg to the Scotch egg, smoothing it to help keep the pork mixture in place.

Gently roll the Scotch egg in the ground almonds, until it has an even coating. Place the scotch egg on a baking tray. Repeat the process with the remaining boiled eggs. Bake for 30 minutes.

Store in an airtight container and refrigerate for up to 3 days.

Fiery fries

350g all rounder potatoes
peeled and cut into chips
1½ tbsps organic butter or
coconut oil, melted
2 tsps paprika
good pinch of sea salt flakes
2 tsps chilli flakes

SERVES 2

Preheat oven to 170°C/350°F.

Bring a large pan of lightly salted water to the boil. Add the potatoes and cook for around 8 minutes, so that they are still quite firm. Remove pan from heat and drain carefully.

Place a sheet of foil on a baking tray. Drizzle with half of the ghee or butter and sprinkle with the paprika, salt and chilli flakes.

Add the potatoes and turn over so they get a coating of spices and oil. Drizzle over the remaining butter.

Cook for 20 minutes then turn the chips over. Cook for a further 20-25 minutes until golden and crispy.

Consume immediately.

Preheat oven to 180°C/350°F.

Mix the coconut milk, flaxseed and almonds in a bowl.

Mix the flours, cocoa powder, bicarbonate of soda, protein powder, dates and chocolate in a bowl. Add the oils, stevia and vanilla extract to the coconut milk mixture. Stir well. Leave to stand for 10 minutes.

Pour the wet mixture into the dry mixture and stir well. Add a drop of water if needed. The consistency should be of a thick paste.

Line several trays with baking paper. Roll small amounts of the mixture into balls. Press gently into disc shapes (maximum 15mm thick) onto the baking paper. Allow some space between the cookies, as they will spread whilst baking. Sprinkle a little extra stevia on top of each cookie, and gently press it into the dough. Bake for 7 minutes. Transfer to a wire rack to cool.

Store in an airtight container at room temperature for up to 3 days.

Spiced apple power porridge

40g porridge oats, (use gluten free oats if preferred), ideally soaked overnight in cold fresh water
1 medium sized apple, diced
15g flaxseed, ground
1 tsp ground cinnamon

SERVES 1

Top Tip:

Pre-soaking the oats overnight makes it easier for the body to digest. It also speeds up the cooking process, which is ideal if you are short on time in the mornings

Place the oats in a saucepan and cook over a medium heat for several minutes, stirring continuously.

If the mixture is a little dry, add a splash of cold water or unsweetened almond milk for extra creaminess.

Add the diced apple and cook for several minutes. Stir in the flaxseed.

½ a small red onion, finely chopped
1 tomato, finely chopped
1 green chilli, finely chopped
½ a pepper (any colour), diced
handful fresh coriander, finely chopped
60g cooked chicken, sliced
½ a small avocado, cut into small chunks

SERVES 1

Whisk the egg whites for one minute.

Melt half of the oil or butter over a medium heat in a skillet or frying pan. Pour the egg whites into the pan, tilting the base of the pan to spread them evenly.

Cook for around 1-2 minutes until the egg is cooked through. Use a spatula to gently loosen and slide onto a plate.

Place the flour, eggs, cinnamon and stevia in a blender and mix until smooth. Add a bit more flour if the mixture is too thin, or if the mixture is too thick, add a drop of cold water or unsweetened almond milk. The aim is to achieve a pourable but not runny consistency.

Heat the coconut oil in a pan over a medium/high heat and then pour in around 50ml of the mixture into the centre of the pan.

Move the pan around gently to even out the mixture into a circular shape. When small holes appear in the pancake (around 1-2 minutes), turn it over and cook for 1-2 minutes, until golden. Transfer to a plate.

Repeat with the remaining batter. Serve with yoghurt and berries.

Poached salmon protein brunch

100g salmon fillet
40g kale
30g closed cup mushrooms
5g organic butter
2 medium sized eggs
salt and pepper to season

SERVES 1

In a large shallow pan, bring some water to the boil - just a couple of inches of water is adequate for shallow poaching.

Add the salmon and poach gently for 8 minutes, turning on each side as it cooks.

In a separate saucepan, melt the butter over a medium heat and cook the mushrooms for 3-4 minutes until soft.

Bring a small pan of water to the boil (again just a couple of inches of water). Reduce the heat to a very gentle simmer and carefully add the eggs.

Poach for 2-4 minutes (2 minutes is ideal for a runny egg).

Add the kale to the saucepan with the salmon and cook it in the water for several minutes. Top up with water if necessary.

When the salmon is cooked - it should be a light pink colour throughout - remove it from the saucepan and set aside. Drain the kale and leave for a few minutes to remove excess water.

Place the kale and the mushrooms on a plate and top with the salmon and the eggs. Season well with salt and pepper.

Summer fruit porridge

50g porridge oats (use gluten free oats if preferred)
150ml cold water
30g mixed berries (fresh or frozen) plus a few extra for topping
3 tbsps strawberry or vanilla flavour whey or rice protein powder (optional)

SERVES 1

Top tip:

This high carb recipe makes an ideal post-workout breakfast.

If possible, presoak the oats for 8 hours or more. Soaking the oats for 10-12 hours overnight makes it easier for the body to digest. It also speeds up the cooking process, which is ideal if you are short on time in the mornings

Mix the oats and water in a saucepan over a medium heat. Bring to the boil then reduce to a gentle simmer. Stir constantly until the porridge starts to thicken.

Add the berries and continue to cook, stirring for 1-2 minutes. Add more water if required if the mixture looks too thick.

Taste test the porridge to ensure that the fruit is heated through. Remove from heat and stir in the protein powder until thoroughly combined. Sprinkle over a few extra berries and serve.

1 tbsp coconut flour
2 tbsps pitted prunes, chopped roughly
2 tbsps organic coconut oil

For the blueberry sauce:

50g blueberries
juice of half a lemon
1 tsp stevia (or natural sweetener of your choice)

Bring a saucepan of water to the boil. Add the sweet potato and simmer for around 8 minutes until soft. Remove from heat, drain and leave to cool.

Mash the sweet potato gently in a fine sieve to remove excess water.

Put all of the other pancake ingredients (except for the coconut oil) into a blender and pulse until smooth. Allow to stand for 10 minutes.

Mediterranean baked salmon & squash mash

2 tsps organic butter or coconut oil
 1 small red onion, finely chopped
 3 cloves garlic, finely chopped
 15 plum tomatoes
 2 x 150g salmon fillets
 2 tbsps basil pesto
 salt and pepper to season
 half a large butternut squash, diced
 pinch of ground cinnamon
 12 asparagus spears

SERVES 2

Preheat oven to 180°C/350°F.

Melt the butter or oil in a frying pan over a medium heat. Add the onion and sauté gently for 3 minutes, stirring.

Add the garlic and tomatoes and sauté for 3 minutes, taking care not to burn the garlic. Remove pan from heat.

Place the salmon into an ovenproof dish, and spoon on the pesto, covering the tops of the fillets. Spoon the contents of the frying pan around the fillets, then season with salt and pepper.

Bake for 20 minutes or until the fillets are cooked thoroughly.

Meanwhile, bring a saucepan of salted water to the boil and add the butternut squash. Reduce to a simmer and boil for around 5 minutes, until soft. Remove from pan, reserving the water. Drain well and mash gently through a sieve to remove excess water. Transfer to a bowl, add the cinnamon and season with salt and pepper. Stir well.

Bring the saucepan of water back to the boil, add the asparagus and simmer gently for 2 minutes. Serve.

Consume immediately.

1 tsp chilli flakes
2 tsps acacia honey
30g per person uncooked basmati rice
30g per person cauliflower, chopped
2 tsps organic coconut oil
1 red onion, finely chopped
5-6 cloves garlic, finely chopped
1-2 inch piece fresh ginger, peeled and sliced
1 red chilli, sliced
handful baby carrots, cut into strips
handful shiitake or oyster mushrooms
400g white fish
1 red pepper, sliced
handful beansprouts

In a small bowl, combine the coconut milk, fish sauce, lime juice, soy sauce, chilli flakes and honey.

Place the rice in a large saucepan of cold salted water and bring to the boil, then reduce to a simmer. When almost cooked, add the cauliflower. Cook for two minutes then drain.

Place a large saucepan over a medium heat. Add the coconut oil and onion and sauté for 3 minutes. Add the garlic, ginger and chilli and stir fry for 1-2 minutes. Add the carrot, mushrooms, and half of the sauce. Stir fry for 3 minutes. Add the fish, red pepper, beansprouts and the remaining stir fry sauce. Simmer for around 8 minutes, until the fish is cooked. Add more of the stir fry sauce as needed. Remove from heat and serve.

Once cooled, store any leftovers in an airtight container and refrigerate for up to 2 days.

Quick fish stew

10g organic butter/coconut oil
2 garlic cloves, finely chopped
1½ tsps ground cumin
1 tsp paprika
1 tsp Himalayan salt
250ml cold fresh water
1 x 400g tin chopped tomatoes
8 cherry tomatoes
1 green pepper, deseeded and cut into chunks
1kg white fish fillets, cut into chunks
60g fresh coriander, finely chopped
1 lemon, cut into four wedges

SERVES 5

Melt butter or oil in a large saucepan over a medium heat. Add the garlic and stir well. Cook for 30 seconds.

Add the cumin, paprika and salt and cook for one minute, stirring continuously.

Add the water and tomatoes. Bring to the boil, then reduce to a simmer. Add the pepper, and simmer for 5 minutes.

Add the fish and cherry tomatoes and cook for 10 minutes until the fish falls apart. Break the fish up with a wooden spoon.

Stir in the coriander and remove from heat. Serve with a wedge of lemon.

Store any leftovers in an airtight container and refrigerate for up to 3 days or freeze on same day.

Melt the butter or oil in a saucepan, remove from heat and brush half of the butter onto both sides of the mushrooms. Place the mushrooms on a foil lined grill tray.

Place the saucepan over a medium heat. When the butter or oil starts to bubble, add the burgers. Cook for 6 minutes then turn over carefully with a slice and cook for a further 5 minutes. Remove from heat.

Meanwhile, prepare a hot grill. Place the mushrooms under the grill and reduce heat to medium. Grill for 5 minutes each side or until soft. Add the cheese slices to the burgers then place under the grill for several minutes, until the cheese has melted.

Place one mushroom on a plate, top side down. Add a burger patty, then a slice or two of tomato, followed by half of the relish (if using) and then top with spinach. Add another mushroom, rounded side up to complete the burger.

Repeat the process again to create the second burger. Serve with a leafy green salad.

Store any leftover burger patties in an airtight container and refrigerate for up to 3 days or freeze on same day.

Melt the butter or oil in a large saucepan and sauté the onion until soft. Add the mince and cook gently until browned. Season well.

Add the garlic, shallots, lemongrass and galangal and cook for one minute. Add the tomatoes, chillis, lime leaves, chilli flakes and most of the coconut milk (reserving a few tablespoons for the mash). Season well and simmer for 10-15 minutes.

Preheat oven to 160°C/325°F.

Bring a saucepan of salted water to the boil and cook the potato for 10 minutes. Add the cauliflower and cook for a further 2 minutes. Drain well, return to the saucepan and mash with a fork. You may want to add a small amount of butter to soften up the mash. When all of the lumps have gone, add the remaining coconut milk and season well. Spoon the mince into a medium sized oven dish. Top with the mash. Cook for 45 minutes and serve.

Once cooled, store any leftovers in an airtight container and refrigerate for up to 3 days or freeze on the same day.

Preheat oven to 175°C/350°F.

In a large bowl, mash up the mince, using a masher or your hands. Add the remaining burger ingredients and mix well until well combined. Shape the mixture into 5 patties, then transfer to a lightly greased baking tray. Oven cook for 10 minutes. Turn over and cook for a 10-15 minutes. The juices will run clear when cooked.

For the vegetable side dishes: Bake the sweet potatoes in the oven for 45 minutes or until soft. Using a fork, scrape the contents of the potatoes into a bowl. Discard the skin. Mash thoroughly and season well. Stir in the cinnamon.

Pour cold water into a non-stick frying pan (just enough to cover the base). Add the tomatoes and cook gently for 2 minutes, stirring frequently. Add the spinach and wilt gently.

Store the burgers and mash in separate airtight containers and refrigerate for up to 3 days.

Lime chicken fajitas

IDEAL FOR BBO

500g chicken breast/
vegetarian chicken*, diced
juice of 2 limes
4 cloves garlic, finely chopped
10g organic coconut oil or butter
1 red pepper, diced
1 green pepper, diced
1 yellow pepper, diced
1 medium sized white onion,
finely sliced
½ tsp ground cumin
¼ tsp sea salt flakes
¼ tsp ground black pepper
pre-soaked wooden skewers

SERVES 3

Note: Some meat free alternatives contain gluten and/or MSG. Please check the label before you buy!

Put the chicken in a bowl. Combine the lime juice and about half of the garlic. Pour the mixture over the chicken, coating thoroughly. Cover the dish and allow it to marinate in the refrigerator for up to 30 minutes. Any longer and the lime juice will break down too much of the tissue.

Preheat the oven to 150°C/300°F or prepare the barbecue for cooking.

Remove chicken from fridge and thread several chicken pieces onto each skewer. Place the chicken on the barbecue or in the oven and turn regularly until cooked through (around 20 minutes).

Heat the oil in a large skillet over a medium heat. Add the peppers, onion and remaining garlic to the skillet. Cook for around five minutes or until tender, stirring regularly. Sprinkle with cumin, salt and pepper. Serve the fajita mix and chicken with a side salad.

Place a large sheet of foil on a baking tray (enough to wrap around the fish).

Place the salmon on the tray.

Sprinkle on the coriander, garlic, chilli and salt.

Squeeze the juice of 2 lemon wedges over the salmon. Place the other 2 wedges on the tray.

Gently wrap the foil around the salmon and seal into a parcel.

Cook for 20 minutes or until the salmon is cooked thoroughly (the flesh should be a pale pink colour).

Store any leftover salmon in an airtight container and refrigerate for up to 2 days.

Lamb curry

4 medium tomatoes
1 tbsp organic coconut oil or butter
1 bay leaf
5 green cardamom pods
1 large white onion, finely diced
700g extra lean diced lamb, diced
1 thumb-sized piece of fresh ginger, peeled and roughly chopped
8-10 garlic cloves, peeled and roughly chopped
1 tsp turmeric
2 tsp coriander powder
1 tsp garam masala
1 tsp sea salt flakes
3-4 green chillis, finely chopped
200ml cold fresh water
160g per person, cauliflower
handful fresh coriander, finely chopped

SERVES 4

Fill a medium sized saucepan with water and bring to the boil. Remove from heat and carefully place the tomatoes in the pan (there should be enough water to cover the tomatoes).

In a large pan, gently melt the oil or butter. Add the bay leaf and cardamom pods and fry for 30 seconds. Add the onion and fry for around 4 minutes, until softened. Add the lamb, and fry for 4-5 minutes, stirring regularly.

In a blender, mix the ginger and garlic, with a dash of water. Add the mixture to the lamb, along with the spices, salt and chillis. Cook for several minutes, stirring regularly.
